

## 17\_10 No Plotting Top and Invert Elevation

### Question:

Can you add "Prop tops and inverts text" not to plot in drn file?

### Answer:

After verifying with Hydraulic's, the following levels will be added to the list of levels not to be plotted in the Roadway design script:

- Exist Drainage Structure Tops and Inverts Label
- Prop Drainage Structure Tops and Inverts LABEL
- Prop tops and inverts text

The pipe top and invert elevations are for Hydraulic Unit use only and will not be plotted in Roadway's plans.
